Introduction

"RE & MI GROUP" is an expert in beauty medical care. We focus on maintaining a healthy mind, body and quality of life based on professional philosophies of human aging and health.

Founder Byung-Han Yoon, a doctor of medicine who majored in modern and oriental medicine, is an education expert who has written many papers and books to foster future generations. Dr Yoon developed a method of extracting cosmetic raw materials from herbal medicines based on 20 years of clinical experience and education related to skin care. He has also developed and launched numerous cosmetic products using his own ingredients. He holds registered trademarks and patents on RE-therapy-based techniques for blood flow care, and pioneering skin care, body shape management, and pain management treatments using blood flow ball therapy. Since 2017, education and clinical experts have gathered to create an esthetics franchise, a concept of total beauty called 'Re Aesthetic' with a brand image of 'adding benefits to beauty'. The franchise offers differentiated programs covering skin, body shape management, permanent makeup, hair, and nails, under the banner of "RE & MI Beauty Group". Another subsidiary, 'RI & MI Cosmetics', manufactures and sells functional cosmetics with the core technology of extracting natural oriental medicinal ingredients as cosmetic raw materials through continuous planning and research by experts from the company's own cosmetics production plant and affiliated research institute. We manufacture and sell healthy dietary products with patented ingredients for healthy organs, the basis of circulatory care, and we are preparing to develop and manufacture medical and beauty devices through 'RI & MI Medical Korea'. Recently, 'RI & MI Beauty Academy' was established to contribute to talent training and boost the in-service training market.
